Subject: RE: Facility Visit

Dear Robert,

Let me get some dates and specific location, and get back to you. To my knowledge, no other members, beside Chemours that is, uses asbestos gaskets and if there were I'd know.

Thanks,

Judith

Hi Judith- I just met with the team here. We are particularly interested in visiting Branham's asbestos gasket fabrication facility (in Louisville, KY?). I know their headquarters is in Louisville but I couldn't remember if their fabrication facility was there as well.

Do you have some dates, preferably in July or also in August when we can do a site visit? It would be two or three of us going.

One of my colleague's been in touch recently with Steve Mingus of Branham Corporation.

Also, if you aware of any other of your members who use asbestos gaskets we would enjoy also learning more about those uses as well.

Regards-

-Robert

Subject: Facility Visit

Dear Robert,

We just concluded a very successful management committee meeting. Eddie Johnston, Chemours, asked if EPA had expressed further interest in visiting their site and that of Branham in order to see the gasket process. I told him that as I remember it had been postponed until after the problem formulation was released. Is that still the case? Let me know if you would like for me to draft a travel itinerary for you and your team to consider.

All the best ... did you take part in the parade yesterday? It was so exciting to see the city get so excited and celebratory – I was buried in meetings but we could hear all the sirens and helicopters!

Judith
